**Hiring Manager**

Wells Fargo Analytics & Data Analyst Program

Dear Hiring Manager,

I am writing to express my strong interest in the Analytics & Data Analyst Program at Wells Fargo. As a Data Science student at Arizona State University's Barrett Honors College (3.75 GPA, Dean's List, Phi Beta Kappa) with an expected graduation of May 2026, I am excited to apply my proven analytical skills and financial analysis experience to drive data-driven business decisions at Wells Fargo.

My B.S. in Data Science with Business Analytics track has provided me with comprehensive technical skills that directly align with your requirements: Python, R, SQL, Tableau, Power BI, and advanced statistical modeling. Currently, as a Data Science Intern at K2 Development Company, I engineered a comprehensive land development financial analysis system using Python and designed interactive ROI optimization tools, experience directly applicable to financial services analytics.

Through my previous internship at TGen, I developed 25+ automated data processing scripts and conducted exploratory data analysis on complex datasets, strengthening my ability to work with large-scale data and maintain attention to detail. This experience, along with my coursework in Statistical Modeling, Machine Learning, and Database Management, has prepared me for this role.

Beyond technical capabilities, I have demonstrated strong leadership and communication skills by founding and instructing bi-weekly "Introduction to R" training sessions for 15+ lab members at the BEAR Research Lab. My ability to translate complex technical concepts to diverse audiences, combined with experience conducting statistical analyses for research conferences, has prepared me to effectively collaborate with cross-functional teams and present data-driven insights to stakeholders.

My analytical work has earned significant recognition, including an Outstanding Poster Presentation Award at TGen and First Place for "Most Interdisciplinary Research" at the Graduate Association of Interdisciplinary Neuroscience Symposium. These achievements demonstrate my ability to excel in competitive environments while maintaining the accuracy and attention to detail that Wells Fargo values.

This program perfectly aligns with my goal of applying financial analysis experience and data science expertise to improve customer experiences in financial services. My proven track record building financial analysis systems and Business Analytics background position me to contribute immediately while growing through the program's mentorship opportunities.

I am eager to bring my analytical expertise, financial analysis experience, and collaborative approach to Wells Fargo's analytics community. Thank you for your consideration, and I look forward to discussing how I can contribute to your team's success.

Sincerely,

Lavanyaa Gupta
